SUMMARY:

Full-stack app developer with IT security, DevOps, and SIEM experience. Pursues ethical hacking on the side. Focuses on being a valuable team member. Always ready to learn. Formerly a college writing instructor.

SKILLS:

- Full-stack JavaScript/Node/Python/AWS app engineering
- Cloud-native DevOps in the AWS ecosystem
- Infrastructure-as-code and CI/CD automation
- Splunk administration, SIEM, and reporting
- Linux administration and Bash/Python scripting
- Enthusiasm for hacking, CTFs, bug hunting, and pentesting

EXPERIENCE:

Consultant | Kintyre Solutions | Feb 2019 - present

- Develop full-stack React/Node/Python/AWS apps
- Engineer Splunk apps, add-ons, and dashboards
- Set up DevOps toolchains - AWS, Hashicorp, other CI/CD apps
- Design cloud-native and cloud-optimized network infrastructure
- Renovate old systems and simplify architectures, e.g.:
 - Apps: LAMP stack → React/Node/Serverless APIs
 - IAM: stored passwords and RBAC → cloud-native solutions
 - Data: messy SQL forests → better data models + NoSQL tables
 - IT: on-prem firewalls and NAT → AWS infrastructure as code

Software Engineer | Barclays | Aug - December 2018

- Diagnose mobile application vulnerabilities
- Develop unit tests, front-end features, and React components

CERTIFICATIONS:

Splunk Admin | Mar 2020

AWS Developer Associate | Aug 2019

CompTIA SY0-501 Security+ | Dec 2018

EDUCATION:

Full-Stack Developer | New York Coding and Design Academy | 2017-2018
